New Rates on Cotton to Eastern Points

wish and the will to oppress them. Surely if there ever was an occasion when the moderate and peaceful counsels of cool, wise, kindly men should be heeded, it is at such a time as this; surely if there ever was a time when wild, silly, passionate fanatics should use their ears more and their tongues less, it is in such an emergency as this. Two Dodes of adjustment may be used. One is an agreement to refer all troubles as to price of work, hours of labor, etc., to intelligent committees chosen from each side. The other is for every labor organisation in the Union to petition Congress to pass a law to pro-

tee, and eight active members elected.

—It was learned yesterday that the woman who was mentioned in yesterday's learned as having been found dead in a house on South street was a victim to drink. She had sold every movable article in the house to buy whisky, and, with her husband lying ill in the house, became beastly drunk. She never waked, and when found had been in one position at so long that one side of her body was perfectly black.

As a result of the conference of general freight agents and other railroad officials which has been going on here for a day or two past, rates on cotton to all Eastern points were increased. The new arrangement went into effect yesterday, the rate to New York being raised from 45 to 57 cents, and to Boston from 50 to 62 cents. One of the interested agents said that under the old rates the roads were not making enough to pay for axle grease.

Messrs. Bailentine & Rogers have been awarded the contract to build the railroad from Vermillionville to Baton Rouge. This is to be a part of the Huntington system, and all freight trains not intended for New Orleans coming over the Southern Pacific road southward will be switched off at Vermillionville and sent to Baton Rouge Thus, it is thought, a saving of 180 mile Chesapeake and Nashville.

The Chesapeake and Nashville, as wil be remembered, was to be completed to Nashville, provided the citizens would take \$500,000 bonds. They were taken, but work on the Nashville end has not commenced. A committee has prepared a letter, which will be sent to C. F. Hunt ington, president of the Chesapeake all. Onio system, asking him whether the report as to the sale of the road to the Louis-vills and Nashville is true. Should it be discovered that the road will not be built the subscribers will refuse to make furthe

Horace Tucker, general freight agent of the Illinois Central road, has issued the following notice to its Illinois agents: The State of Illinois proposes this year to make a grand display at New Orleans of the products of 1's soil, and to make it a success this company has consented to make three points on its line—namely, Chicago prinefield and Cairo-places to receiv any and all shipments that are purely the products of the soil, when consigned to either of the places mentioned, if said

Please do me the favor to place me correctly upon the record upon this very important subject and oblige. Very respectfully, wm. B. MOORE. The Labor Problem. 'In the sweat of thy face thou shalt eat 'In the sweat of thy face thou shalt eat bread," was the sentence pronounced on Adam for his first sin, yet labor has always been man's best friend. It sharpens his faculties, stimulates his energies and cheere his patient industry. It begets the wish to improve his evadition, acquire and hold property and surround himself with such comforts and luxuries as may be at his command. The vegabend and tramp are the only exceptions to this role.

Much has been written about engine and most of it, like Mr. George's concep-tions of it, just about as lucid and importions of it, just about as jucid and impor-tant as the backneved question: "Does the egg come from the chicken or does the chicken come from the egg?" After all it is only this: Capital is the surplus earning: of labor. Together they move the world. They are the elements of trogress. They have always been and will always be allies, simply because neither can do without the other. Neither is worth anything except in co-partner-ship with the other. They frequently quarrel, but they always discover, sooner quarrel, but they always discover, sooner or later, that they must be friends again if they would prosper. Some times capital stimulates labor to an overproduction, and both parties suffer; labor always the most because it cannot easily change its modes of industry, while capital is often ready for any new channel of
